Telecom Product & Service

Field Force Automation (FFA): This solution streamlines and automates installation workflows. Once an installation is booked, customer details and GPS data are synced to a mobile app used by technicians, who can receive SMS notifications about their schedules. It also handles equipment tracking and process visibility for telecom installations—all aimed at delivering faster, smoother service.

- Field Force Automation software for telecom service delivery and quality assurance with enhanced user experience
- Supported development of OoredooCRM, NMS, Granite Inventory
- Process Automation - UAT, SIT, Demand Analyst roles
- GIDAM, RSS, CRM one click development support
- JIIRA Digitalization PLM process, Ooredoo TV
- NSF, SSS development, WFM, Major role in Copper to Fiber migration E2E
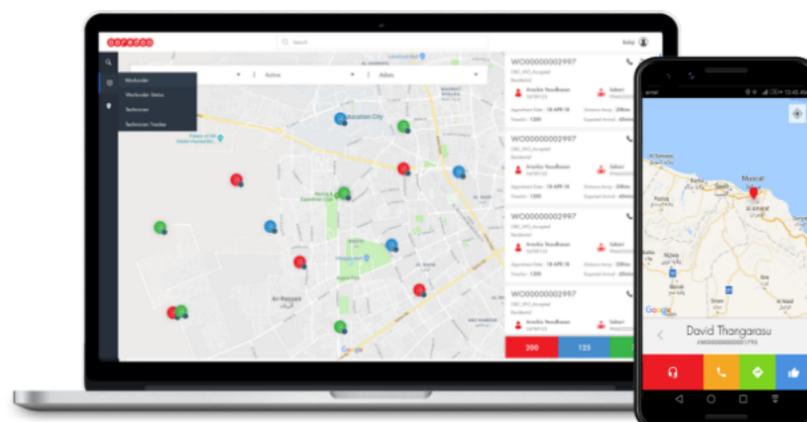

E-Commerce Solutions and Integrations

Ecommerce in these days in COVID-19 is be essential for any shop. Think of the value of the shop and customer count visiting in person in upcoming days. Virtual or digital platform enhances the simplicity of ordering and delivering with less human integrations.

- Qsale Android/ Ios apps
- Web Store
- Delivery app
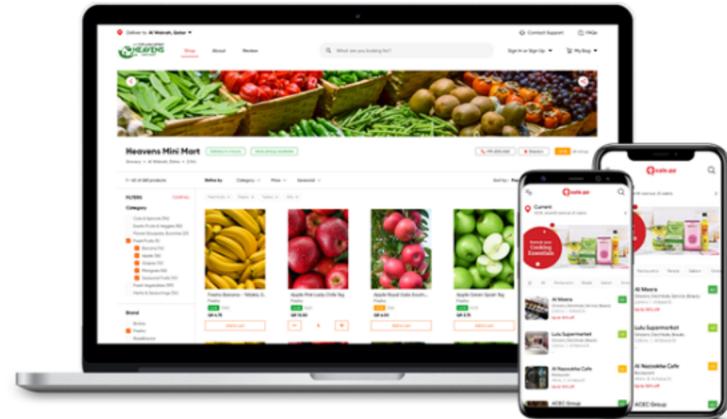

Digital Marketing

Now a days everything has turned out to be Digital!

The Older or traditional Marketing tactics can be great, but majority of consumers find and research online before making a purchase or choosing a client or product etc.

As a rule of Thumb, companies should be publishing new blogs at least once in a week. These type of maintenance keeps your website updated and Fresh that the search engines prefer.

We offer you with a Monthly Maintenance Program and take care of all your Digital Marketing needs!
